

My Misio Reloaded

By Gemma Adeva (www.waselwasel.com)

In 2006, Madoka Muno, a Japanese based in Australia, decided to create My Misio as her final project for college. Misio is a small amigurumi cat that behaves like a human (and also loves to eat!) Madoka started crocheting little Misios and sell them online. His idea was to recreate the life of Misio in photographs and document how we are able to imagine different stories with the same object depending on our place of origin, our personal history, customs ...

My Misio Reloaded is based on the original Misio, that its currently unavailable for buying. That way you can also have a Misio and enjoy her company in your adventures.

HOW TO ATTACH THE PIECES

The first thing we will do is prepare the arms and legs of Misio. To do this, take a pipe cleaner and cut it in half, you will get two small pieces. Repeat with the other pipe cleaner. We now have four pieces and you have to fold each one in half and roll it over itself. That way:

Insert the pipe cleaners in the arms, don't add stuffing. Cut the excess.

Then do the same with Misio legs, but this time place a little filling along the pipe cleaners.

Shape it with your hands so that each leg is uniform.

Hold with pins all parts of the body, taking care that they are in the place you want. Then sew.

Finally, sew and embroider the eyes and the nose. To embroider the nose, make a pistil stitch. You can see how to do this stitch step by step here:

<http://www.embroidery.rocksea.org/stitch/knots/pistil-stitch/>.

To achieve the look of Misio's nose, wind the thread around the needle about ten times. It will be easier to do this stitch with a needle that is the same width throughout its length.

Finished, you have your own Misio to come with you wherever you go. Enjoy it!
